

# Veterinary Permission Slip

In keeping everyone safe, we abide by the vaccination recommendations presented by the American Animal Hospital Association (AAHA). All dogs must be vaccinated for their appropriate life stage.

Your dog must be seen regularly by a licensed veterinarian and deemed to be in good health, free of communicable diseases or parasites, and adequately protected against disease for your dog's health and the health of our other students.

We ask that any dogs or puppies new to the family wait at least 14 days prior to attending class to guard against transmitting diseases that may be incubating before you brought them into your home.

Client's Name: \_\_\_\_\_

Dog's Name: \_\_\_\_\_ Age: \_\_\_\_\_ Breed: \_\_\_\_\_

Date: \_\_\_\_\_

As a licensed veterinarian, I verify that the listed dog is updated on age-appropriate vaccines and either has a negative fecal test or received dewormer. I verify that the listed puppy is healthy enough to attend classes and I give my permission for them to attend Latah Creek Animal Hospital workshops.

Required Vaccinations:

- Rabies
- DHPP (Distemper/Parvo)
- Leptospirosis
- Bordetella
